

CASE STUDY

Client: BSS Cardiff
End User: Purolite
Project: New Factory
Products: HevaSteam Steam/LTHW Packaged Heat Exchanger
Date: June 2018

Project Description

Arbe received an order to design a steam/water heat exchanger to provide heating water for a new factory for a pharmaceutical company in Wales.

The package was installed with a system circulating pump, delivering water to a package mounted low loss header, ready for distribution to the process. The unit was also supplied complete with all necessary controls and equipment required.

The HevaSteam package was installed by our client ready for connection to the system, and Arbe completed final commissioning, completing another project designed and completed by Arbe Integrated Engineering.
